

Understand the program. Choose with clear information.

This public information document preserves the program illustration in the existing website package. It is not a new payout promise, a signed partner agreement or a certificate of legal or Meta compliance.

1. Training and referral participation

Skill Seller Digital Hub sells educational courses and offers a separate referral program. The existing program includes commission on qualifying direct course sales and eligible team sales across multiple levels. Course enrollment purchases a learning service; it does not guarantee employment, sales, income or recovery of the course fee.

2. Read before participating

Read the published Partner Policy and obtain the applicable written terms before sharing a referral link or accepting participation. Confirm the relevant course rate, qualifying sales, attribution rules, eligible levels, refund adjustments, payout timing, thresholds, taxes and termination conditions. Ask support if these terms are unavailable.

3. Honest representation

Disclose your referral relationship. Explain the actual course curriculum and access conditions accurately. Do not fabricate earnings, describe training fees as investments, promise returns or claim that a course certificate establishes government approval.

COMMISSION ILLUSTRATION

Course price and Affiliate Rate are different.

The previous published example used a course MRP of INR 1,000 and an eligible Affiliate Rate of INR 600. The shares below apply to that INR 600 allocation, not to the entire course MRP.

Eligible level	Share of Affiliate Rate	If Affiliate Rate = INR 600
Level 1	50%	INR 300
Level 2	30%	INR 180
Level 3	20%	INR 120
Total	100%	INR 600

What the illustration does and does not establish

The example records the existing published three-level structure. It does not establish that every course allocates INR 600, that every partner qualifies for all levels, or that a sale automatically produces a payable amount. It does not change the existing account calculation or determine entitlement in a dispute.

Confirm the current operating plan

The owner has described direct-sale and team-sale commission. The exact current eligible levels and product-specific rates still require written confirmation against the operating plan. If the actual structure differs from this illustration, issue a dated correction before using the illustration as an offer.

Ask support for the binding product-specific terms and a worked example of a paid sale, a refund and a chargeback. No new payout threshold, payment date or eligibility rule is invented in this document.

RESPONSIBLE PARTICIPATION

Consumer rights and channel rules apply.

Sales and recruitment

Do not promise payment merely for enrollment or recruitment, promote a pyramid or money-circulation scheme, or induce a course purchase by promising recovery of its price through referrals. Review applicable Indian requirements with qualified counsel before relying on a compensation structure.

Refunds and account questions

The website describes a voluntary course offer of a 90% refund of the paid amount for requests made within seven calendar days. This does not limit a stronger remedy required by law. Commission adjustments for refunds and chargebacks follow the applicable written terms; obtain them before participation.

WhatsApp usage

WhatsApp Business Messaging Policy restricts MLM promotion or facilitation. Consent, local registration, a neutral course label or moving figures into a PDF does not override a platform restriction. Do not use this PDF as authorization to promote a restricted program through WhatsApp. Ordinary training is not automatically exempt; actual content and use matter.
